3041AA: \$153.00	3041AB: N/A	Mobile Wireless E-Mail	<p><u>Blackberry Service</u></p> <p>Blackberry Service integrates seamlessly with the NMCI user's existing e-mail account providing a wireless extension of their NMCI e-mail mailbox. Nationwide wireless network support is only provided to existing commercial infrastructure and coverage areas. Features include the ability to read, compose, forward, reply, delete or file unclassified messages using a single NMCI e-mail address and mailbox. Service only supports "Enterprise" server e-mail redirection provided by NMCI. No desktop redirector functions will be supported by this service. Users can control which messages they receive on their wireless handheld by setting e-mail filters that monitor key words and message fields from their NMCI data seat. This service is only interoperable with NMCI provided e-mail services and does not include interoperability with other messaging systems (e.g. DMS). This service incorporates advance Triple DES encryption technology to meet security guidelines for remote e-mail access for all incoming and outgoing transmissions.</p> <p>E-mail message content remains encrypted at all points between the Blackberry wireless handheld messaging device and the NMCI e-mail account, ensuring the integrity and security of the data. Forwarding of attachments is supported. Opening and reading attachments is not supported. Personal organizer software, including calendar, address book, memo pad and task list is included. Basic paging service is included. This service is available for unclassified use only. This service is FIPS 140-1 compliant. Also included is discreet notification of arriving e-mail and secure password capability. Additional software required will be made available under CLIN 0023. This service does not include "Poison pill" technology to automatically secure/wipe lost devices, integration of a hardware token/CAC, roaming access, or Web access.</p>	CLIN 0001AA, 0001AB, 0001AC CLIN 0002AA, 0002AB CLIN 0003AA CLIN 0004AA, CLIN 0004AC	No	RIM	Model Number: Blackberry 857 and 957	SOO's: 3.1.2, 3.1.14, 3.2, 3.5.1 (excluding PKI), 3.5.2, 3.6.1, 3.6.2, 3.6.3 SLA's: 2, 3.1, 3.2, 3.4, 16, 23, 30, 33, 36, 36B, 36C	Yes

EXHIBIT D - SOFTWARE ADDITIONAL SERVICES

The software products listed below provide individual user access to applications. Prices for software service include installation, future upgrades, maintenance, help desk support, and computer based training. If requirements exist for software services for multiple users they may be aggregated and submitted to the cognizant ACO or the lead ACO if the requirements are for multiple claimants/locations. ACOs will negotiate quantity discounts based on the requirements.

Some restrictions apply to certain software products as indicated by numbered applicable notes. Those restrictions are as follows:

Note 1. Applications will be loaded on only one designated NMCI data seat with access and licensing provided to one designated NMCI account user.

Note 2. Application features and functions will be limited to those provided as part of the standard, commercially available COTS product. Features or functions that negatively impact Gold Disk operations or IA policy will be disabled. If required, additional functionality may be purchased separately under CLIN 0029.

Note 3. The application's ability to support Information Assurance shall be in accordance with the terms and conditions of the NMCI contract. Provided, application features and functions will be limited to those provided as part of the standard, unmodified, commercially available COTS product. If required, additional functionality may be purchased separately under CLIN 0029, provided that the additional functionality and enhanced software capabilities/features, including but not limited to: IA Support for CAC, PKI, access control, user authentication features, Privacy Act Information protection, Certification and Accreditation (C&A), DoD/DoN IA policies and Computer Network Defense 9CND) does not negatively impact Gold Disk operations or IA policy or function. Any features or functions that negatively impact the Gold Disk operations or IA policy, including any applicable SLA's, will be disabled.

Note 4. All COTS products made available, will only be provided when based upon standard, unmodified, off-the-shelf software without enhanced capabilities/features. COTS software will not be disruptive to the operation and functionality of the NMCI Gold Disk.

Note 5. Deployable support will be the same as all other deployable support services.

Note 6. User support documentation provided as a part of the commercial software package will be provided to the user. Additional manuals and references must be purchased separately.

Availability Column: "Yes" denotes that the CLIN is available for new orders. "No" denotes that the CLIN is not available for new orders. Customers may continue to renew their order for this CLIN however, EDS will continue to perform in accordance with commercial best business practices by continuing to make available the OEM's maintenance and technical support for as long as the OEM makes such support available to EDS. This support includes any patches or upgrades provided by the OEM. Whether or not a CLIN is marked "No" EDS shall fix any problems or issues it causes which adversely affects the CLIN.

EXHIBIT D - SOFTWARE ADDITIONAL SERVICES

The software products listed below provide individual user access to applications. Prices for software service include installation, future upgrades, maintenance, help desk support, and computer based training. If requirements exist for software services for multiple users they may be aggregated and submitted to the cognizant ACO or the lead ACO if the requirements are for multiple claimants/locations. ACOs will negotiate quantity discounts based on the requirements.

Some restrictions apply to certain software products as indicated by numbered applicable notes. Those restrictions are as follows:

Note 1. Applications will be loaded on only one designated NMCI data seat with access and licensing provided to one designated NMCI account user.

Note 2. Application features and functions will be limited to those provided as part of the standard, commercially available COTs product. Features or functions that negatively impact Gold Disk operations or IA policy will be disabled. If required, additional functionality may be purchased separately under CLIN 0029.

Note 3. The application's ability to support Information Assurance shall be in accordance with the terms and conditions of the NMCI contract. Provided, application features and functions will be limited to those provided as part of the standard, unmodified, commercially available COTS product. If required, additional functionality may be purchased separately under CLIN 0029, provided that the additional functionality and enhanced software capabilities/features, including but not limited to: IA Support for CAC, PKI, access control, user authentication features, Privacy Act Information protection, Certification and Accreditation (C&A), DoD/DoN IA policies and Computer Network Defense 9CND) does not negatively impact Gold Disk operations or IA policy or function. Any features or functions that negatively impact the Gold Disk operations or IA policy, including any applicable SLA's, will be disabled.

Note 4. All COTS products made available, will only be provided when based upon standard, unmodified, off-the-shelf software without enhanced capabilities/features. COTS software will not be disruptive to the operation and functionality of the NMCI Gold Disk.

Note 5. Deployable support will be the same as all other deployable support services.

Note 6. User support documentation provided as a part of the commercial software package will be provided to the user. Additional manuals and references must be purchased separately.

Availability Column: "Yes" denotes that the CLIN is available for new orders. "No" denotes that the CLIN is not available for new orders. Customers may continue to renew their order for this CLIN however, EDS will continue to perform in accordance with commercial best business practices by continuing to make available the OEM's maintenance and technical support for as long as the OEM makes such support available to EDS. This support includes any patches or upgrades provided by the OEM. Whether or not a CLIN is marked "No" EDS shall fix any problems or issues it causes which adversely affects the CLIN.

4010AA: \$32.00	4010AB: N/A	Software - Collaboration Tool	eRoom: Included in the monthly service price for eRoom are the user access license(UAL), installation, server license, server HW to store the eRoom data within NMCI, data backup, maintenance and management of server, and 24/7 helpdesk support. A separate UAL is required for each named user. "Named User" is every individual person who has a UAL and accesses the eRoom workplaces. An "eRoom Workplace" refers to a specific location (or series of related locations) on the Network created with eRoom software. eRoom workplaces are designated by a unique URL(s) that can be accessed by Named Users that are granted permission by the customer's administrative representative. Workplaces are provided up to equal to 50% of the number of named users. Additional Workplaces are provided at an additional charge. The eRoom Client SW will be loaded on the NMCI Gold Disk and will be available from any NMCI seat by Named Users. Each Named User will have 100MB of shared disk space allocated to their eRoom(additional space is available for an additional fee). 		<p>eRoom: (continued): The servers will be dedicated to DoN usage and each server may support multiple DoN eRooms. If a DoN customer requires a dedicated server, it would be provided separately at an additional charge. On-Line, web based training is provided which includes: description of the digital workplace, tour of the eRoom environment including front page and tool bar and eRoom object types, function overview and project execution (drag and drop, version control, access control, search, notifications, polling, intercom and presence, notes, routing, links, and eRoom monitor), and quick reference sheet to facilitate use of the eRoom workplaces. Virtual classroom training, seminar training, or hands on training for eRoom is not included in the UAL price but can be purchased as an additional priced item. Technical Account Managers(TAM) will be provided to assist in the establishment and management of the eRooms.</p> <p>Professional Services are the professional services provided by the ISF such as development of customized software code, practice templates, or project management. Professional services are available at an additional charge. The number of UALs is assumed between 1000-2500. The service price does not include either manuals or a copy of the SW installation disk.</p>
